

INDEX

Molecular basis of cancer heterogeneity determined by 'microgenomics'	Mariko ESUMI et. al	1
The role of bacterial flagellin in the pathogenesis of asthma	Shuichiro MARUOKA et. al	7
Circadian variation of Holter-based T wave Alternans and association with heart rate and autonomic nerve system in normal heart subjects	Kenichi HASHIMOTO et. al	10
Role of Ganglionated Plexi and Epicardial Adipose Tissue in the Maintenance of Atrial Fibrillation	Yasuo OKUMURA et. al	15
Postoperative liver steatosis in pancreatoduodenectomy: treatment strategy	Shintaro YAMAZAKI	22
Influence of duration of Parkinson disease on outcome of STN - DBS	Chikashi FUKAYA et. al	27
The development of novel prostate cancer therapeutic agents	Daisuke OBINATA et. al	29
Study on the rapid molecular diagnosis on pediatric <i>Campylobacter colitis</i>	Trinh Duy Quang et. al	32
Study of the teaching inhalation with digital media to patients with asthma and COPD	Reiko ITO et. al	35
Study on the vascular endothelial and smooth muscle cell function using ultrasonography in atherosclerosis	Kazumi FUJIOKA	38
Relationship between Myocardial Perfusion SPECT and Cardiac Event Risk after Revascularization	Shunichi YODA et. al	41
The change in trapezius-muscle blood flow and hardness during stellate ganglion block and linear polarized light irradiation near the stellate ganglion	Yuko KONDO et. al	44
Proteome analysis of C - Reactive Protein (CRP) binding protein	Sayoko OGURA et. al	46
Study on the rapid detection for Norovirus genome in stool samples	Pattara Khamrin et. al	49
The mechanism of the progress and rupture of coronary artery unstable plaque	Atsushi HIRAYAMA	51
Study on the mechanism of exaggeration by both influenza virus and oral/respiratory tract bacteria and the pathogenesis of exaggeration for respiratory disease	Tatsuo YAMAMOTO et. al	54
Pre-clinical study of pyrrole imidazole polyamide targeting TGF β - Analysis of its effects on hypertrophic scars	Noboru FUKUDA et. al	60
Spinal cord stimulation for minimally conscious state	Takamitsu YAMAMOTO et. al	66
Study on angiogenic activity in mouse dedifferentiated fat cells	Hirofumi WATANABE et. al	71
Effects of digitization for the change of environment and the expansion of work in Multimedia Studio	Koichi INOUE et. al	77
Support for the poster creating and extended use from graphics of the large format printer with the Canon Image PROGRAF iPF9400	Hiroko KUROE et. al	80
Medical research support center, Laboratory for animal experiments setting apparatus, conditions of X - ray diagnostic apparatus	Yoshiki TANIGUCHI et. al	83
Introduction to Electron Microscopy Laboratory, Morphological Section of Research Institute of Medical Research Support Center, and The Usability of Ultrastructural Morphometrical Study using Endomyocardial Biopsy in the Era of Heart Transplantation	Toyoharu JIKE et. al	87
Lists of publication and results from Utilization in Medical Research Center		91
